Hamamatsu city, Shizuoka, Japan

Date& Time : **24 Jan. (Fri) 2025**, 15:00-16:30

Venue : **Kurokami South Campus, Kumamoto University
Faculty of Engineering, Building no. 2, Room 223**

* You can also attend virtually through ZOOM

Krishna Nath, a materials scientist, currently serves as an R&D Supervisor at Eurofins Japan. After earning his Ph.D. in Japan in the field of synchrotron radiation, he gained experience in both academia and industry. Additionally, he is the founder of NPO Science Forum 21, a non-profit organization dedicated to enhancing science education in developing countries, especially in his native country, Bangladesh.

In this seminar, he will discuss key strategies for building a successful life and career as a foreigner in Japan.

The presentation will focus on three core principles:

1. Love Japan, 2. Live in Japan, and 3. Grow in Japan.

He will also share insights from his own experiences, including both his successes and challenges.
